

# Residential KNOX-BOX® To The Rescue

Knox Residential 1650 Series

**Protect residential property from forced entry damage during fire and medical emergencies. Safely secure your entrance key in a Residential KNOX-BOX®**

Fire departments gain entry into this key box with the Knox® Master Key. It is a high security master key used only by your local fire department for emergency access. The Residential KNOX-BOX® is just part of the department's Knox Rapid Entry System.

Knox-Box key boxes already protect businesses, schools and commercial properties against forced entry damage and delayed emergency response. Key boxes, vaults, cabinets,

key switches and padlocks provide complete and secure key control for your local fire department.

The Residential KNOX-BOX is available in a permanent, surface-mounted version with a lift-off door (Model #1650) or a hinged door (Model #1658). There is also a temporary door-hanging version with a lift-off door (Model #1651) or with a hinged door (Model #1659) used for emergency medical access during temporary illness.

**Residential Knox-Box® key boxes protect your family and your property during emergencies.**

### **Emergency Medical Services**

When you are injured or become critically ill, paramedics can respond quickly, without forcing entry, when a KNOX-BOX is installed by your front door. They simply remove the entrance key stored inside, provide medical assistance and re lock the door when they leave.

### **Fire/Security Alarm Response**

If no one is home and an alarm activates, firefighters and other emergency responders must determine if it is a false alarm or an actual emergency. Without a KNOX-BOX, responders often force entry to determine the answer.

### **Fire Sprinkler System Shut Off**

Fire sprinkler protection in single-family homes, apartment complexes and condominiums is becoming more common. Extensive water damage can be prevented when firefighters quickly access the home and determine the cause.

## Senior Citizen “LifeLine” Support

Elderly and/or critically ill citizens who depend on medical support services such as LifeLine™, also rely on fast response to calls for emergency aid. Knox-Box key boxes prevent forced entry and additional stress for the patient.

## Paramedic and Firefighter Safety

When emergency responders cannot unlock the front door, they search for an alternate means of entry. Sometimes it is difficult to determine which rear window or door to try before forcing entry. If they accidentally enter the wrong apartment, serious injury can result from the surprised occupant.

## Gated Communities Access

Quickly getting through the gate and to the resident that called for help is often difficult. With the Knox System, the gate can be opened with a Knox Key Switch and the person in need can be reached by unlocking the front door with an entrance key safely stored in their Residential KNOX-BOX.

## About the Knox Company

Since 1975, Knox has been manufacturing high security key boxes, key vaults, armored cabinets, key switches, padlocks, master key retention devices and locking FDC plugs and caps. This proven rapid entry system reduces response time, property damages and the liability for lost keys. More than 10,000 first responders and the communities they serve depend on Knox products and services.
